

**For Immediate Release:**

**ONE EARTH DESIGNS UNVEILS SOLSOURCE SPORT KICKSTARTER  
CAMPAIGN, A REVOLUTIONARY PORTABLE SOLAR COOKER**

*SolSource Sport to Bring Pack n' Go Solar Grilling to Outdoor Adventurers and Chefs*

San Jose, California, May 15, 2017 -- One Earth Designs, creator of the popular SolSource Solar Grill, announced today the launch of its Kickstarter campaign <https://www.kickstarter.com/projects/scotfrank/solsource-sport-cook-anywhere-under-the-sun> to premiere its newest revolutionary solar cooker, the SolSource Sport. The Sport model is the latest addition to One Earth Designs' line of clean energy solar stoves, powered by patented solar technology that harnesses 92% of the sun's rays.

"We are launching our innovative SolSource Sport model in response to the demand for a more portable solar-powered grill," said Dr. Catlin Powers, founder and CEO of One Earth Designs. "SolSource Sport is ideal for outdoor enthusiasts who need to travel light and for families who want to cook with the sun in small places or on-the-go.

Dr. Powers is a leading global authority in solar energy. She holds two patents in the field and teaches Sustainable Business & Entrepreneurship at Harvard Center for Health and Global Environment. Powers and her team founded One Earth Designs ([www.oneearthdesigns.com](http://www.oneearthdesigns.com)) in 2013 with the mission to design products that help people live sustainably within the resources of our one Earth.

The SolSource Sport packs more solar power per square foot than any other device. It fits into a 2-foot carrying case, weighs only 4.5 kilograms (10 pounds), and cooks a meal in just 10 minutes. It also heats up 5 times faster than a charcoal grill. Made up of one-hundred percent recyclable materials and designed with Life Cycle Assessment, One Earth Designs has thought of everything to make their product eco-friendly to the core. After a quick and easy assembly, the SolSource Sport heats up immediately. It reaches cooking temperatures in seconds and is capable of boiling water in 10 minutes or less, using only solar power.

One Earth's products are fuel-free and produce zero emissions. They harness natural energy from the sun and require no propane, charcoal, electricity or other fuel. Durable

solar reflectors are designed with patented self-heating polymers, which stay cool while heating the grill pan, and are easy to clean with just soap, warm water and a soft cloth.

SolSource Sport is a great backyard grill and is also perfect for beach bbqs, park picnics, camping, sailing, tailgating and more. SolSource Sport is perfect for people who love fun in the sun.

### **About One Earth Designs**

Since 2013, One Earth Designs has been setting a new standard for global business as one of the top-ranked responsible businesses on B Corp's Best for the World List. The founders developed SolSource as a solution for energy poverty while working with nomads in the Himalayas. Today, their revolutionary solar-powered stoves are used by customers in over sixty countries.
